Upcoming Training at UCA

BeOn for Wi-Fi and LTE optioned Portables and Mobiles

UCA will be hosting BeOn programming training for agencies that have purchased L3Harris mobiles and portables with the optional Wi-Fi and LTE feature sets. This training is being provided by UCA so that agencies will have the ability to program their own radios with these options.

Time and Location

The training will be held from 8:30am-5pm on June 17th, 2025, at the UCA main office located at 5215 Wiley Post Way #550 in Salt Lake City. There are approximately 30 seats available, but a Microsoft Teams meeting will also be available for those that cannot attend in person.

How to Get Started

Attendees will be required to:

- sign a UCA agreement acknowledging UCA's Terms of Use for BeOn on radio
- provide UCA with IDs of the radios that BeOn will be enabled on
- fill out the talk group spreadsheet with the required talk groups
- have the ability to program their own radios. Programming cables, dongles and software can be purchased from Deb Burton deb.burton@l3harris.com

To signup, please reach out to Garrett Millward at gmillward@uca911.org to get on the attendee list.

Thank you,

Tina Mathieu
