Minimum Standard #1

A PSAP shall utilize the ECaTS Staffing Forecast Module, provided to PSAPs at UCA's expense, to comply with minimum staffing recommendations. The ECaTS Staffing Forecast Module relies upon the Erlang-C formula which factors in call volume, call duration, and required call answering times to formulate a minimum staffing level. The model should be run using the following variables: Service Level Goal - 95%; Answer Time Goal-15 seconds; Call Duration- the "mean" time calculated and shown by ECaTS; Growth Factor - 0%; Wrap Up - 10 seconds; Additional Agents - 0. In order to claim compliance, a PSAP will need to meet the recommended staffing forecast (not the boundaries) at all times during the calendar year. It should be noted, this formula returns data for call-takers; dispatchers do not count in the totals.

Minimum Standard #7

Ninety five percent (95%) of all 911 calls arriving at the PSAP shall be answered within fifteen (15) seconds. This standard will be measured using the "PSAP Answer Time" report available through ECaTS. For purposes of compliance with this minimum standard, the following criteria should be used when generating the report: Select Range -Last Year (January-December); Period Group- Year; Call Type - 911 Calls; Abandoned Filters - Exclude Abandoned; Agency Affiliation - Default except unselect training. For the purposes of compliance with this standard, the box showing the "% answer time <15 seconds" under the "Overall Percentage" will be used.
